

ATTENTION!

PLAGIARISM – MISREPRESENTATIONS – RENAMING

In response to the ongoing plagiarism of his medical discoveries, Dr. Hamer legally protected his work under the English name **German New Medicine®**. Yet, the plagiarism, misrepresentations, and renaming of German New Medicine® continue to this day.

We at LearningGNM categorically distance ourselves from the groups and individuals listed below.

... birds of a feather flock together...

TOTAL BIOLOGY® is an organization founded by **Dr. Claude Sabbah**, a French medical doctor who had studied with Dr. Hamer in France in the mid-1980s. In 1993, Sabbah was ready to take over the “New Medicine”. Mixed with NLP (Neuro Linguistic Programming)), Psychogenealogy (Anne Ancelin- Schutzenberger, Josie Kromer), and other theories, he called his “new science”(sic!!) “La Biologie Total” or “Total Biology”. To this day, followers of Sabbah, notably **Gérard Athias**, **Olivier Soulier** as well as offshoots of Total Biology, including **Biological De-Programming or Biogenealogy** (**Christian Flèche**, **Patrick Obissier**), **Biodecoding®** (**Anne-Marie Boularand**, **Daniel Gambarte**, **Enrique Bouron**), **BioReprogramming®** (**Isabelle Benarous**), **Awareness Heals** (**Dr. Nelie Johnson**), **Quantum University** (**Dr. Paul Drouin**), **Bioneuroemoción** (**Enric Corbera**), **Lecture Biologique** (**Emmanuel Corbeel**), and **Recall Healing®** (**Gilbert Renaud**) continue to corrupt Dr. Hamer’s original work.

META-Medicine® is plagiarizing Dr. Hamer’s discoveries on a large scale. In 2004, **Johannes Fisslinger** (Los Angeles, CA) and **Dr. Anton Bader** (Germany) callously took over and renamed Dr. Hamer’s medical research of over 20 years! Today, **Richard Flook** (Canada) acts as the international head trainer. Dr. Bader serves as a “Brain Relay Diagnostics Specialist”?! **CAUTION:** None of the persons mentioned in this document, including Dr. Bader, have been trained by Dr. Hamer in the skill of brain scan analysis based on GNM.

Other proponents of this fraudulent organization are **Annie Gedye**, **Cindy Galvin**, **Rob Waghmare**, **Deborah Wiggins-Hay**, **Sharon Curry**, **Joanne Davis**, **Tremayne Reiss**, **Joanne Ross**, **Dr. Kwesi Anan Odun** (UK), **Sidse Brodersen**, **Martin Hejlesen**, **Lars Mygind**, **John Rhodes** (Denmark), **Rob van Overbruggen** (Netherlands), **Stephane Provencher, D.C.**, **Jane Oelke**, **Nicole Taylor**, **Yve Evans**, **Gregory Dean**, **Dr. Kevin Chan** (USA), **Cindy Hubka** (Canada), **Anu Mehta**, **Gita Jayakumar** (India), and **Christa Krahner** (Australia). **META-Health® (META-Health University) and Lifestyle Prescription® (Lifestyle Prescription University)** are additional trade names of the META-Medicine Association. Richard Flook also operates under the trademark **Advanced Clearing Energetics®**.

Despite Dr. Hamer’s remarkable success rate, the founders and followers of META-Medicine persistently claim that GNM cannot offer any therapy (“Dr. Hamer did not use any therapy at all”, “Dr. Hamer’s method and therapy is ineffective”, Fisslinger in a 2016 interview with Dean Sterling Jones). This disinformation only serves as a pretext for the use of techniques and “alternative” treatment methods such as Neuro Linguistic Programming (NLP), Time Line Therapy®, Matrix Reimprinting, Emotional Freedom Technique (EFT), Picture Tapping, Body Talk, Heart Math, Color Therapy, Crystal Therapy, Reiki, and the like, that are entirely unrelated to GNM and to the therapeutic approach as practiced and taught by Dr. Hamer.

Peter Fraser developed a body-field scan called **NES-Nutri-Energetics System®** or **BioEnergetiX WellNES System®** that supposedly detects “energetic distortions” caused by emotional issues that “might still be presenting as conflicts”. It should come as no surprise that Fraser and META-Medicine are ardent collaborators.

EPFX/SCIO, developed by **William Nelson**, is a biofeedback device based on a random event generator that tests a large database of items, including “Hamer Herd facilities”! This alleged “Cancer Scan” matches the data of the disturbed brain area with other stored information. Because of the large number of parameters involved, the results are rather unpredictable. Once again, Dr. Hamer’s name and research is being carelessly misused.

Dr. Hamer: “Those groups and individuals who plagiarize and corrupt my discoveries say that GNM cannot offer any therapy. They make the patients as well as the public at large falsely believe that their ‘therapies’, their ‘remedies’, or their ‘devices’ are an application of German New Medicine. This deception is serving self-interests and only distracts patients from finding help and healing through the truth of the Five Biological Laws. In over 90% of cases, the body heals itself.”

NLP (Neuro Linguistic Programming) is using Dr. Hamer’s findings in their Time Line Therapy® / Time Empowerment™ Techniques without giving credit to Dr. Hamer or providing any reference to the original research material (see [NLP Example of a Takeover](#)).

To erase any traces to Dr. Hamer, in NLP a DHS (Dirk Hamer Syndrome) is called a SEE (“Significant Emotional Experience”).

From Recent Trauma:

Current thinking is that it is not the childhood trauma that causes the cancer; it is a more recent trauma. It is also important to understand that it is the first event that allows the more recent SEE to create a lesion in the brain. One procedure in addition to Medical treatment is to release the SEE using what seem to be traditional psychological methods. But, doing this, even an imagined SEE is sufficient to bring back a relapse of the cancer symptoms. Our experience with Time Line Therapy™, however, is that the recurrence of the cancer can be prevented if the emotion on the first event is also released.

In META-Medicine, the term DHS has been renamed to STLE (“Specific Traumatic Life Event”).

BIOLOGIKA® is the trade name for an organization founded by **Roberto Barnai** (Hungary). According to his own account, in 2004, after he had received a colon cancer diagnosis, Barnai came across Dr. Hamer’s work over the internet. He admits that thanks to the “New Medicine”, as it was then called, he is today a healthy man. After his recovery, he decided to “share this knowledge with others” but under a different name! While Dr. Hamer was held in prison in France (September 2004 - February 2006), Barnai walked away with Dr. Hamer’s intellectual property. In 2006, he published the *Biologika Organ Atlas* (in Hungarian and German). Dr. Hamer: “He stole everything from my books.” – On his website, Barnai writes pretentiously: “Owing to him [Barnai’s] work, today, Biologika is a recognized and accredited subject of the official medical training at Universities throughout Hungary”. Considering that Dr. Hamer’s medical discoveries have been consistently denied by the academic establishment (see University of Tuebingen in the Hamer Biography on this website), this is hard to believe. We, therefore, contacted several universities in Hungary and were informed by all of them that, contrary to Barnai’s claim, “Biologika” is not offered in any of the accredited medical education programs. – Meanwhile, Barnai teamed up with Gilbert Renaud and Recall Healing. His representative in the Netherlands is **Enikö Papp**.

Academic deceit is evidently also a trait of **Marco Pfister**. Originally a fervent supporter of Dr. Hamer, Marco Pfister founded in 2003 ALBA (Associazione Leggi Biologiche Applicate) for the purpose of promoting GNM (“Nuova Medicina Germanica”) in Italy. When Dr. Hamer learned that Pfister, who had no clinical experience with GNM, issued “diplomas” to medical professionals, claiming at the same time that German New Medicine cannot offer any therapy, the relationship fell apart. In 2013, Pfister transformed ALBA into **“Formazione Professionale 5LB”** (Professional Training 5 Biological Laws) and joined the new organization to the Université Européenne Jean Monnet (UEJM) in Brussels. At first, this sounds impressive. A closer look, however, reveals that the UEJM is not a “university” but a non-profit association (registered in Belgium) with no academic accreditation. As a member of UEJM, Pfister offers a four-year 5LB master program and at the end of the fifth year, a student receives the title “Professor of 5 LB”. Right after he had joined the UEJM, Pfister awarded himself

with a “Doctorat en 5 Lois Biologiques”, “certified” by the UEJM, that is, from his own organization.

Nicolas Barro belongs to a group in Germany (led by David Münnich) that renamed German New Medicine to **“5BN”** (Dr. Hamer: “I expressly forbid you to rename and corrupt the ‘Germanische Neue Medizin’”, Source: Open letter to Barro, 10/08/2007). Barro likes to present himself as a medical expert (Dr. Hamer: “I consider you and your accomplices as practitioners of GNM entirely **unqualified**”). In Germany, Barro gives “5BN” courses for health practitioners and for future “5BN Dozenten” (the German word for university lecturers). In Asia, he produces advertising literature for representatives of META- Medicine! In the 63-page booklet *Nature Path - The Healing Power of Nature*, (“professional content by Nicolas Barro”, “English version by Nikki Merz and team”), he summarizes Dr. Hamer’s findings by carefully omitting the name of the originator. Instead, so he writes nebulously, “the content is based on modern scientific discoveries and ancient methods”!

In 2017, **Dr. Melissa Sell**, a chiropractic doctor in the U.S., appeared out of nowhere to present herself as a German New Medicine authority. We came to know Dr. Sell through the GNM videos she posted on YouTube. As in her podcasts, in most of these presentations she copiously “borrowed” material, in parts verbatim, from this GNM website without any reference to the source. After she was reminded of her copyright violation, she added an acknowledgment to some of the videos. However, the unauthorized copying from LearningGNM.com continues.

A serious matter of concern is Dr. Sell’s **lack of knowledge of the practical application of GNM**. The so-called “Resolve Method” that she promotes via the online “Ever Better Life University”(!), founded by her and her partner Steven Ravnstag, is in total contradiction to the GNM approach, supported by Dr. Hamer’s clear statement: “When I discovered the First Biological Law, I thought that one has to resolve all conflicts as quickly as possible. Today, I know that this was a mistake.” Anyone with a basic knowledge of GNM is aware that under certain circumstances, a conflict resolution can lead to life- threatening complications during the healing phase (see GNM Therapy). The catchy slogan “Conflict Resolution is a Lifestyle” Dr. Sell uses to draw people into her “Resolve Community” is both **irresponsible and dangerous**. Through her videos, Facebook activities, and the postings on her websites, she is making the public falsely believe that she is a competent GNM therapist. The truth is that **Dr. Melissa Sell has never obtained any German New Medicine training! Those who are looking for support, particularly with respect to the proper practical use of GNM, must therefore be on alert.**

In 2018, Dr. Sell teamed-up with **Ingmar Marquardt** from Germany. Marquardt, an associate of **“5BN”**, created a German cartoon about the Five Biological Laws, “historically called GNM”, according to his advertisement. The vilification of the scientific value of GNM as well as the cartooned depiction of Dr. Hamer and of the death of his son Dirk is a disgrace, showing the “5BN”(!) logo on Dr. Hamer’s chest a mockery. Yet, Dr. Sell did not hesitate to serve as the English speaker for this “5BN” for Dummies production.

In early 2019, Dr. Sell joined forces with **Andi Locke Mears** (NC) to form the **“USA German New Medicine”** association. In April 2021, they changed the name of their organization to **“Germanic Healing Knowledge Global”** with **Nellie Barnett** (Australia) as a co-founder. Andi Locke Mears’ self- designated role within that organization is to “teach and support practitioners as they learn to use GNM with their clients”. Ms. Locke Mears has attended several classes with Caroline Markolin. However, to position herself as a qualified GNM trainer of U.S. health professionals and as an instructor of the clinical application of GNM is, in our opinion, highly questionable. It is, furthermore, most disconcerting that the founders of “USAGNM”/“GHK Global” offer their members an online platform for their “business”, that is, for the promotion of products and modalities that are entirely unrelated to GNM. It is obvious that Dr. Sell and Andi Locke Mears don’t fully

comprehend Dr. Hamer's work, particularly with respect to the GNM Therapy, and are not willing to accept that German New Medicine® is not just another "complementary" or "alternative" medicine but stands on its own.

Benefiting from the untimely death of Helmut Pilhar, who was Dr. Hamer's closest collaborator in the German-speaking world, in 2022, **Andi Locke Mears** teamed up with Nick Capetanis to establish the "**GHk Pilhar Academy**". This relationship ended in 2023. In a public letter, the management of the "Academy" separated from the collaboration with Andi Locke Mears due to several conflicts of interest, including concerns about the "integrity and purity" of passing on Dr. Hamer's discoveries. Since early 2024, Andi Locke Mears partners with a medical doctor from Europe (Croatia) who prefers not to disclose his name... and the saga continues.

M. Barış Muslu (Turkey), author of *Sağlığına Format At* (Format your Health), is marketing his takeover of German New Medicine® under the brand name **NeuroFormat**, a modality built on Dr. Hamer's discoveries, mixed with NLP and EFT. He never gives credit to Dr. Hamer research as the source of his GNM knowledge.

Dr. David Holt, D.O. HMD (Integrative Medical Center, Nevada) falsely presents himself as "the leading U.S. physician in German New Medicine". In his **YouTube video "German New Medicine. Creating a Heart Attack - An Animal Study"**, Dr. Holt shows in an interview with **Dr. Mercola** how a "territorial loss conflict" was intentionally inflicted on a healthy dog. When, six weeks later, the experimenters returned the animal to his territory, the dog had a fatal heart attack (commented by Dr. Mercola and Dr. Holt with laughter). **Dr. Hamer strongly opposes the testing on animals.**

Dr. Hamer: "today's animal testing is nothing but cruelty, ignoring that animals have a soul. Therefore, I allow myself the following prediction: one day, all animal experimentation will be exposed as a disgrace for our whole society and will be seen as a testimony to our unspeakable lack of knowledge and sensitivity." (see also Carcinogens Theory).

Dr. Keith Nemec, a chiropractic physician located in Illinois (USA), offers consultations for prospective patients through this German New Medicine page (<https://www.revolutionnewmedicine.com/german-new-medicine>) of his website. We must emphasize that there is no connection between Dr. Hamer's German New Medicine and Dr. Nemec's "Revolution New Medicine". This includes the Total Health™ therapeutic protocol of his clinic. The statements in association with German New Medicine are a grave misrepresentation of Dr. Hamer's discoveries.

Since we keep receiving inquiries about the "**German New Medicine**" **Facebook page**, hosted by **John Theobald** (Canada), we must make it clear that LearningGNM.com is not associated with that page.

Because of his obvious **misuse of the trademark German New Medicine®** through the presentation of subjects that are entirely unrelated or contradictory to Dr. Hamer's work as well as his postings of personal comments under a protected trade name, we firmly distance ourselves from John Theobald's Facebook activities.

NLP – Example of a Takeover

Caroline Markolin, Ph.D.

March 6, 2006

A few days ago, the article "Using NLP and Time Line Therapy® Techniques while Healing Cancer", posted on the NLP website, was brought to my attention.

The article is based for the most part on Dr. Hamer's German New Medicine®. However, there is neither any credit given to Dr. Hamer, as the originator of GNM, nor is there any reference to Dr. Hamer's research material.

The article shows well-known strategies. By renaming GNM terms such as "DHS" (Dirk Hamer Syndrome) that would identify Dr. Hamer's findings as the source of information, the author deliberately distracts the readers from the authentic research material.

It is unfortunate that with this article Neuro Linguistic Programming is now also bearing the stain of plagiarism. I am sure that many NLP practitioners, especially those who know GNM and respect Dr. Hamer for what he has given the world with his revolutionary work, are not in agreement with such unethical conduct.

What follows are excerpts of the article. For those, who are not so familiar with Dr. Hamer's research, I highlighted relevant sections and provided links to the corresponding section on our LearningGNM website. Explanatory comments are written in brackets with my initials CM.

And I quote...

Tad James: Using NLP and Time Line Therapy™ Techniques while Healing Cancer

Exciting News: In the past 10 years, there has been more and more exciting news in the field of dis-ease... (and I do misspell the word on purpose). Old concepts on the nature of consciousness and on the nature of the body are changing. We have been using many of these concepts in Time Line Therapy®/ Time Empowerment™ Techniques for some time now, and many of these concepts are new. **Let me warn you in advance, that this article may change your viewpoint about your mind and your body. It has a potential to be controversial.** This change in the structure of our belief systems is necessary to affect a change in the way we assist people in healing themselves and others.

The Significant Emotional Experience:

Another major theory of our Time Line Therapy®/Time Empowerment™ Techniques training is that many mental and physical dis-eases are preceded by a **Significant Emotional Experience (SEE)** of a negative nature which may appear in the client's recent past, or even further in the past, such as during childhood. If negative, and depending on the intensity, the SEE has the potential to create or be the source of some emotional, mental or even physical dis-ease occurring in the body.

Let's define some terms so that we are speaking the same language: **(I borrow the notion of an SEE from the sociologist Dr. Morris Massey, in the book *The People Puzzle*.)** First event means the very first time that an experience happens, or the root cause of a first event occurring (this is also called root cause). **Significant Emotional Experience is any major, fully associated, highly charged emotional event wherever it occurs.**

Releasing Negative Emotions: Not only does the release of negative emotions clear up physical health, it also has the potential to improve the mental and emotional health of the person. This paradigm is no longer just a theory. **What verified the basic theory of Time Line Therapy® is a result of the research of German Medical Doctors, whose research now encompasses 45,000 cases of cancer research (CM: To state that “German medical doctors” have verified the theory of Time Line Therapy®/ Time Empowerment™ Techniques is an odd twist. The truth is that it is the achievement of ONE German medical doctor, namely of Dr. med. Ryke Geerd Hamer, who has researched all 40,000 cases. For over 25 years, Dr. Hamer has been criminalized and persecuted by the medical establishment (see Dr. Hamer’s Biography). The accuracy of his scientific findings has been verified 28 times by professional associations who had the courage to stand up for GNM. This includes the University of Trnava, Slovakia.)**

Starts with a Severe Trauma: A growing number of Medical Doctors now believe that all cancer starts with a severe psychological conflict that throws you into shock. Here is what happens: “You isolate yourself, and do not share your emotions with others. You are upset and do not share with others, you're obsessed about the conflict (CM: see **First Biological Law**). This conflict changes your life completely, you will never be the same.” This is a description of what we call a major Significant Emotional Experience, or SEE (CM: see **First Biological Law, DHS**). This type of SEE, according to current thinking, usually occurs on the average up to one to three years prior to the onset of the first symptoms of cancer.

Trapped Emotions: When the SEE occurs, the emotions associated with the SEE are trapped in a certain spot in the brain (CM: see **First Biological Law, Hamer Focus**) and according to research, a “short circuit” occurs (CM: in his early publications Dr. Hamer refers to the impact of the DHS in the brain as a “short circuit”, which he later revised, based on his findings that the physical symptoms that are triggered by the impact of the conflict (DHS) in the brain are not an error of Nature but instead Significant Biological Special Programs designed to assist the resolution of the conflict – see **Fifth Biological Law**). He (CM: who is “he”?) says that the physiological process is close to, or like

a stroke. A number of doctors (CM: who are the other doctors?) have related the location in the brain, with the tumor location in the body, and the type of trauma which caused it (CM: see First Biological Law).

When a major SEE like this occurs, there is a trapped emotion in the brain, **the brain suffers something like a mild stroke and starts sending wrong information to a certain part of the body** (CM: Dr. Hamer emphasizes that the information that is communicated from the affected brain area to the corresponding organ is a not a “mistake” or “wrong”, but a biologically meaningful event (see Fifth Biological Law). The word “stroke” is an entirely inappropriate term) and then a cancer growth starts in that area. The nature of the SEE determines the area of the brain, and the type of cancer. The rate of growth is also dependent on the SEE (CM: see First Biological Law). As soon as the SEE is eliminated, there is an edema that occurs in the area where the trapped emotions were. This edema can be seen on a CT-Scan! Once the edema occurs, the cancer growth stops, and healing begins (CM: see Second Biological Law, Healing Phase, Cerebral Level). A trained MD can see the edema on the CT-Scan, and know about the area of the brain and, therefore, the type of cancer. Often, we forget about our conflicts and SEE's, so we aren't sure of the source. Areas where there were old, trapped emotions will often show up on the CT-Scan as “old stroke” areas. This is important to understand in the treatment of cancer, because the immune system may not have to fight cancer cells. **The immune system** (CM: see Immune System Theory) **does not even have to recognize cancer cells, necessarily, because the problem is in the brain – the answer is to heal the brain.** This happens in the resolution of the initial conflict or SEE (CM: see Second Biological Law, CL-Conflictolysis). There are a growing number of doctors who feel that cutting, burning and/or poisoning a tumor is not the answer. If a tumor affects the proper functioning of an organ then the tumor will have to be cut off, but not the rest of the organ. This means that only a total of perhaps 2-3% of the cancer will have to be cut out in the process of treatment.

It is important to note that even an imagined conflict/SEE can be enough to start or restart the cancer symptoms, even if it seems small or inconsequential to you (CM: see Second Biological Law, Tracks). For example, in research done in Germany, a woman who had cervical cancer got it by re-reading her dead husband's love letters and feeling as though in his death he was refusing to have intercourse with her. The SEE can be as simple as the running away of a pet, the stock market going down, losing a job, terrorism, or even listening to a neighbor gossip. Whether or not any of these actually make a difference in your physiology depends on your own personal history, and whether there is an emotional chain present for the SEE to connect to.

According to the current thinking, **carcinogens may not play as big a role in the creation of cancer** (CM: In an interview given in 1992, Dr. Hamer says: “In truth, there are no such things as carcinogenic substances. Scientists have made so many research studies on animals and have never yet, by any of these animal experiments, shown that there exists a single carcinogenic substance ...” – see Carcinogens Theory). This idea will, I'm certain, raise some eyebrows in certain committed health food types (of whom I am one), but this does raise some disturbing questions. Why, for example, do women smokers have a significantly lower rate of bronchial and lung cancer than do men smokers? Research says that women smokers have fewer **territorial conflicts (the type of SEE that causes bronchial cancer)** (CM: see Biological Special Program of the lung alveoli, Smoking and Lung Cancer) than do men, and so the percentage of that type cancer in women is lower. Of course, as women proceed more and more into their rightful place of equality in the workplace, we can expect the statistics to move more into equality too. So, there is a price for success!

Now what about situations where the cancer has been found to spread (**metastasize**) in the body to other areas of the body? The commonly accepted theory in medicine right now, is that a cancerous cell splits off from the main cancer and travels through the blood stream to other areas of the body, where new cancer growth then starts. **Research flatly rejects this idea. First of all, according to the current thinking it has not been possible for researchers to cause cancer cells to metastasize in any laboratory experiment** (CM: see “Metastasis Theory”). Rather, what really happens is that the patient goes to see a Medical Doctor, and the doctor gets suspicious. So the doctor

orders extensive testing. The report says, "Cancer." And it sounds so final! The patient is terrified, knowing life will never be the same, **creating a new SEE**. In this case the fear causes lymph cancer, **and the fear of death will start lung cancer (CM: see GNM Article "The Nature of Tumors")**, two of the major places to where cancer is known to metastasize. Now the well-meaning medical doctor says, "It is all over the body." And the body responds.

Another scenario, the patient undergoes surgery, and feels a **lack of self worth**. If the reproductive system is operated on, the patient will feel like less of a man or woman, and may say "I'll never function the same way again," or, **"Now I'm worthless."**

Another SEE, another cancer. The process is not the spreading of cancer, it is the spreading of SEE's (CM: see GNM Article "Rethinking Osteoporosis").

Now how do you use this information to assist the healing process using Time Line Therapy® / Time Empowerment™ Techniques? **It seems that there are two main stages in the process of cancer: (CM: see Second Biological Law).**

1. The Dis-ease Phase (CM: see Second Biological Law, Conflict-Active-Phase): SEE occurs, the client has no strategy for dealing with the trauma, the emotion is trapped in an area of the brain, the brain begins to send wrong signals to the area of the body, and **a tumor growth occurs in a corresponding area of the body. During this phase, the patient feels uncomfortable, tense, sometimes sleepless, and has cold hands and feet. This indicates activity of the sympathetic nervous system.** (The sympathetic nervous system is the system that we use in thinking, planning, action, etc.) A healthy person can switch from the sympathetic to the parasympathetic nervous system at will. **During the Dis-ease Phase the client is in the sympathetic system only.**

2. The Healing Phase (CM: see Second Biological Law, Healing Phase): **The SEE is released, conflict is resolved, the trapped emotion in the brain is released, an edema in the area of the brain occurs, and the tumor stops growing. In this phase the client immediately switches to the parasympathetic system. The client will feel relaxed, tired, will need more sleep and be more hungry.**

Sometimes the Healing Phase can be uncomfortable. A client called me the day after a Time Line Therapy® / Time Empowerment™ Techniques session, and said, "My whole body is uncomfortable, it aches, especially my head." I told him to get a deep tissue massage, and enjoy a hot tub, and to be happy because the reaction of the body was telling him that we were releasing some major "stuff" (a technical term). **According to current thinking, if the tumor has been growing for more than 9 months it is possible that the client will not be totally comfortable during the Healing Phase (CM: According to Dr. Hamer's research, this "9 month" time limit applies exclusively to a territorial loss conflict involving the coronary arteries and not to organs that might develop a tumor).** **In this case the resolution of the Dis-ease Phase may produce other discomfort which could include swelling of the brain, edema, heart arrhythmia or other temporary organ dysfunction, headache, migraine, or even mild epilepsy in some cases (CM: see Second Biological Law, Epileptoid Crisis).**

During the Healing Phase, the client needs to be comfortable. Schedule the Healing Phase to have a minimum of stress on the client (CM: see GNM Therapy). While healing, get away from it all, take a nap each time you yawn, exercise daily, and eat and drink moderately. Above all, have no responsibilities except healing.

There is hope. The University of Calgary, Department of Medicine, has investigated, and now uses Time Line Therapy® / Time Empowerment™ Techniques and The Basic of Personality as a text book in one of its oncology (cancer) treatment classes for training Medical Doctors (CM: In spite of two court orders, the Medical Faculty of the University of Tuebingen, Germany, persists in refusing to evaluate Dr. Hamer's post-doctoral thesis, which summarizes his scientific findings on the origin and healing of cancer – see Dr. Hamer's Biography. In 1997, Dr. Hamer was sentenced to 19 months in prison for having given three people free medical information based on his "New Medicine". In 2004, Dr. Hamer was sentenced to three years in a French prison for "fraud and the illegal practice of medicine" on the grounds that people in France had supposedly suffered damages through having read his publications. Dr. Hamer was released from prison on February 17, 2006.) NOTE: After consultation with the Division Head of

the Department of Oncology of the University of Calgary, we were informed that there is no affiliation with NLP and neither are the Time Line Therapy®/Time Empowerment™ Techniques taught at the Oncology Department.

There is hope. Several psychology departments including St. Joseph's College in Calumet, Michigan are teaching Time Line Therapy®/Time Empowerment™ Techniques in the college to psychology students, and they are using The Secret of Creating Your Future (1989, James)... **NOTE: There is no St. Joseph's College in Calumet, Michigan!**
